

A detailed cross-sectional view of a container assembly, labeled as FIG. 1. The diagram shows a central cavity (3) containing several cylindrical components (3a, 3b, 3c, 3d). This cavity is surrounded by a thick, multi-layered wall (4). The outermost layer (9a) has a hatched pattern, while the inner layers (5, 6, 7) have different textures or are solid. A central vertical shaft (8) passes through the center, ending in a flange (10) at the bottom. The top of the container features a lid (11) with a gasket (12) and a handle (1a, 1b). The bottom of the container has a base (1c) and a support structure (10). Dimensions D and G1 are indicated.
